# About This Document

## What is a wireframe?

---

Wireframes are a page blueprint prior to the visual design used to illustrate the flow of information, document all objects to be included on the page and show the behavior and states of some of these objects. They are not meant to reflect actual design or content.

## Design aspects for consideration

---

- Representation of selected content and functionality that will reside on a page to bring the strategic concept to life.
- An allocation of page real estate to illustrate priority and placement.
- Intent of copy - indicative of the eventual design. This includes titles, labels, links, prompts and instructions.
- Schematic that identifies key page areas (modules).
- Direction for visual design explorations.

## Aspects not for wireframe review

---

- Final copy or branding treatments
- The design/look&feel of the page
- Representation of the specific photography to be used
- The final layout of future content and functionality

Desktop/Tablet/Mobile

# Template M Desktop

## Template M (Desktop)

This shows how template M: 'HomePage' will work on desktop devices.

### Message States\*

Serious Alert  
Warning Alert  
Informational Message  
Success Message  
\*[See Wireframe: "0.0 Local Home Page (with alert)"]

### Unique Widgets

'Twitter' feed widget

## annotations

M.1. Hyperlinks leading within site.

M.2. For 'Global' based home pages, a zip code box with a header, related copy, a text field box and a button to execute going to the local screen based on the zip code entered is displayed. Contains an IP detection the pre-populates zip code. When 'zip code' box is displayed, it takes up a larger real estate space of the 'hero' image space. For 'Local' based home pages, a flex module is displayed.

M.3. Optional 'Twitter' feed box. This is pulled from 'United Water's twitter feed.'

M.4. Flexible module area. Please refer to the 'Flexible Modules' document.

M.5. Hero images can auto-rotate after X seconds

# Template M Tablet

## Template M (Tablet)

This shows how template M: 'HomePage' will work on tablet devices.

### Message States\*

Serious Alert

Warning Alert

Informational Message

Success Message

\*[See Wireframe: "0.0 Local Home Page (with alert)"]

### Unique Widgets
