TABLE OF CONTENTS

About This Document

What is a wireframe?

Wireframes are a page blueprint prior to the visual design used to illustrate the flow of information, document all objects to be included on the page and show the behavior and states of some of these objects. They are not meant to reflect actual design or content.

Design aspects for consideration

-Representation of selected content and functionality that will reside on a page to bring the strategic concept to life.
- An allocation of page real estate to illustrate priority and placement.
- Intent of copy - indicative of the eventual design. This includes titles, labels, links, prompts and instructions.
- Schematic that identifies key page areas (modules).
- Direction for visual design explorations.

Aspects not for wireframe review

- Final copy or branding treatments
- The design/look&feel of the page
-Representation of the specific photography to be used
- The final layout of future content and functionality

annotations
Template F

1. 'edit' hyperlinks turn the copy into editable text fields. Upon selection, 'edit' hyperlink changes to a 'save' hyperlink.
2. 'add new email address' hyperlink opens up 1. drop down for type 2. text field for email address 3. 'save' button
3. 'enroll now' hyperlink allows for an expansion of a text field and an 'ok' button if the user is not registered for email notifications
4. on initial display, 'current password' has an 'edit' hyperlink and the password is hidden behind ellipsis. The 'password' fields only display when the user selects the 'edit' hyperlink. On password change view, 'password criteria' informational module box appears.
5. 'delete' hyperlink deletes the city set for an alert with the 'delete' hyperlink turning to 'restate'
6. 'add' hyperlink displays 1. 'zip code' text field 2. state drop down 3. city drop down 4. ok button
